

DATA SHEET

Zallys - Brio

ZALLYS BRIO

In spite of the small size the BRIO is a very sturdy electric wheelbarrow thanks to the steel chassis powder coated with exterior paint.

The BRIO offers high performance with an operating duration guaranteed for a working day. You will never get tired on loading and discharging the Brio even when travelling for long distances. It is ideal for those who have small construction jobs even on scaffolding, gardening or any type of work where transporting loads up to 200Kg is required.

The 300W motor has an electromagnetic brake that prevents accidental slipping while on ramps up to 30% at full load. The gears in oil bath avoid any kind of maintenance and the machine can be cleaned easily without causing short circuits thanks to the controller and the well cabled wires kept in an hermetic ambient.

The manual tilting system of the Brio gives the possibility to equip and change rapidly different types of accessories depending on the expected use.

Machine length:	1347mm
Machine width:	740mm
Wheel base:	572mm
Frame height:	380mm
Machine weight:	82kg
Electric motor:	24 V
