

DATA SHEET

Powered Tug - M8 Pipe / Tube Transporter

ZALLYS M8

Created to satisfy the demand for a safer workplace while retaining speed and manoeuvrability, the M8 is equipped with a tiller head and a steering motor wheel able to turn through 320°.

This permits the safe movement of long materials such as bars, tubes or pipes.

Thanks to the ease of steering, and helped by the front traction motor wheel, the M8 is able to transport heavy long loads with little effort and align them with an operating station or production line.

The M8 can be supplied to suit the length of material to be conveyed.

The traction motor and control system is easily accessible for inspection.

Machine length:	2842 mm
Machine width:	582 mm
Wheel base:	1736 mm
Surface height:	610 mm
Machine weight:	266 kg
Electric motor:	24 V
2 traction batteries:	2 x 80 A

* Max tow weight conditions apply
