

DATA SHEET

Zallys - HS Universal Transporter

ZALLYS HS

Zallys HS - is an electric transporter with handlebar steering with a work capacity over 8 hours. The HS is suitable to move a load up to 400 Kg. HS is very handy and suitable to be used in productive plants, warehouse storage, and in any other material movement operation, making it simple avoiding the hard work while increasing efficiency.

It can be equipped with interchangeable skips or crates. The electronic system that controls the forward motion or the backing speed is guided by a knob accelerator making the work easier and safe even in narrow places. HS is supplied with an extra red lever for safety which allows to work only in the presence of assigned personnel. The motor has an electromagnetic brake that blocks off the vehicle preventing accidental slipping while on ramps up to 30% at full load. The gears in oil bath avoid any kind of maintenance. The tilting system gives the possibility to equip and change rapidly different types of accessories depending on the expected use. All Zallys vehicles are produced with high quality materials and are CE certified according to the latest European normative.
