4 wheels electric transporter with a loading capacity up to 600 kg / 1323 lbs, ideal to cover daily operations with a single charge.

This electric trolley has a great stability and is suitable to be used in productive plants, warehouses, and in any other material movement operation, making it simple avoiding the hard work while increasing the efficiency.

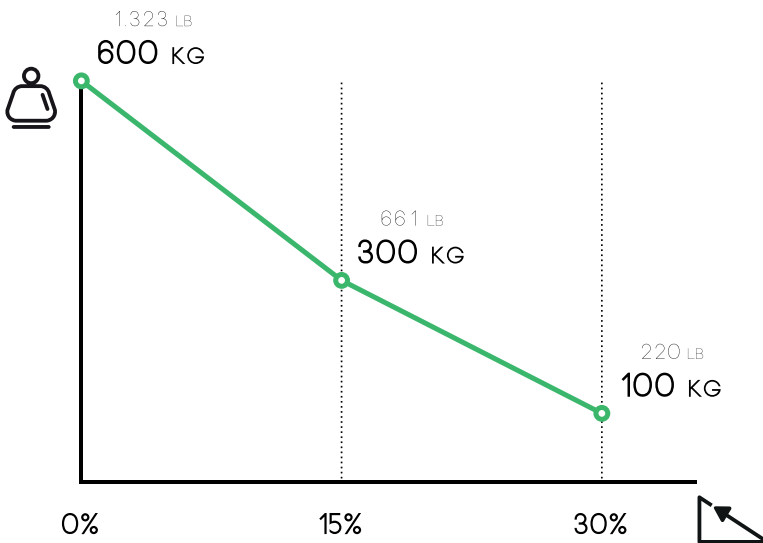

It can be equipped with interchangeable skips or crates. The electronic system that controls the forward/backward speed is guided by a knob accelerator, making the work easier and safe even in narrow places.

The tilting system of the gives the possibility to equip and change rapidly different types of accessories depending on the expected use. Also available with heavy duty axles to load up to 1000 kg.

Our electric vehicles are not only CE certified but, more than 80% of the range is covered by the UL certification, which guarantees its suitability to the standards applicable in relation to potential risk of fire, electric shock and mechanical hazards.
