Powered Tug - D1 Electric Wheel Barrow Bumper

D1

Electric wheelbarrow designed to work with loads up to 300Kg. The frame is made from steel and powder coated with exterior paint. We have worked hard to create the right balance between the load and the wheels to give the customers confidence when using the product which allows them to manoeuvre the wheelbarrow easily.

The D1 is supplied with a key for easy start up, a red safety dead mans lever, emergency stop button, LED to show the battery power status, low level battery acoustic detector, and an external plug for a fast and easy charging. The 600W motor has an electromagnetic brake that automatically engages when the power is turned off, this brake is more than adequate on slopes up to 30% when the barrow is fully loaded.

The gear train is in a sealed oil bath, eliminating maintenance, the electric control unit is in an enclosed casing allowing the machine to be cleaned without causing short circuits. The tilting system of the D1 allows accessories to be inter-changed quickly and easily.

All Zallys vehicles are produced with high quality materials and are CE certified according to the latest European normative.

Machine length:	1410 mm
Machine width:	773 mm
Wheel-truck:	760 mm
Frame height:	430 mm
Machine weight:	126 Kg
Tiller head height:	902mm
Electric motor:	24 V
