

WHEELCHAIR MOVER

SIMPLE & SECURE

WHEELCHAIR

TRANSPORTATION!

The WheelChair Mover is the first and only FDA approved power assist wheelchair unit, making patient transport safe, smooth and effortless. The durable design allows the unit to navigate any surface with ease – including across carpets, tiles, concrete or up ramps.

The WheelChair Mover attaches to a variety of standard, bariatric & staxi wheelchairs. It uses a simple hand lever design that activates secure hitching to the frame of the wheelchair. The ergonomic design of the mover makes it easy for the operator to also control the speed with the controlled throttle acceleration.

Benefits:

- Patient experiences smoother and safer transport
- Transport team endures less strain and fatigue
- Prevents staff injury risk from heavy loads
- Higher employee morale; higher productivity
- Quiet operation and compact design
- User friendly controls
- Maintenance free operation

Specification - Standard/Bariatric:
