Making a difference by design

Relentlessly adding value to your clinical care.

We understand that today's healthcare reality presents a host of challenges to your clinical, financial and operational success. That's why we work closely with medical professionals to develop the clinical and exam room advancements that matter.

BREWER – Clinical & Exam Room Solutions'

Redefining patient & staff safety.

Our solutions set the standards for safe, confident handling of even your most problematic patients, including elderly, limited mobility, and bariatric populations. At the same time, they minimize caregiver handling, safeguarding the health of your staff and your bottom line.

Improving your competitive position.

Innovative designs and capabilities enable you to see the broadest possible range of patients and provide a wider range of services. They also help preserve patient dignity and enhance patient satisfaction – from the exam room to the procedure suite.

Model 6801 shown in Plus (non-standard) Admiral upholstery

Optimizing your return on investment.

At Brewer, expert ergonomic design, quality materials and made-in-USA craftsmanship come together to create lasting values. It's most evident in our major breakthroughs, like the FLEX™ Access High-Low Exam Table that puts power table performance within virtually any practice's economic reach. But you'll also see it in the details like easy-to-clean surfaces to expedite infection control and industry-leading warranties for greater peace of mind.

Doing more to safeguard your patients & your practice

Leading the way in safety.

Patient handling can be a risky proposition for patients and staff. That's why Brewer is proud to take the lead in introducing the advancements that help assure patient and staff safety throughout so many exam and procedure environments.

More confident patient transfers

Only Brewer offers a power exam table that allows the seat back to be raised in the chair position when at its lowest seat height. The upright seat back, combined with safety grab bars – standard, provides three points of contact during wheelchair transfers. This unique capability helps assure more confident patient transfers, enhances patient independence, and minimizes physical demands on caregivers.

Power Exam Tables

Advancing patient & staff safety.

Brewer Access® High-Low Exam Tables set the standard for safe patient handling. Our 18" (45.7 cm) profile in the seated position offers level transfers from wheelchairs while the rotating safety grab bars and upright seat back enable more confident transfers, with less caregiver interaction. Brewer's exclusive SafeGlide™ leg extension allows caregivers to slide the heavy-duty extension in and out with minimal effort. Seat height ranges from 18"-37" (45.7 cm-94 cm) accommodate various examination needs, while our innovative pass-through drawers and work surface give you the flexibility to make the most of compact exam room footprints.
